

Quality Policy & Risk Management Policy

JNR Civil operates within the civil construction industry where risk management is very much a part of our daily work. The management of risk is also necessary to protect our financial security and viability as a service provider to our customers.

Our customers expect and are entitled to a consistently high standard of product delivered within an agreed timeframe and in strict accordance with the terms and specifications of a contract.

So that JNR Civil can always be our customer's supplier of choice we must all monitor, review and personally commit to a philosophy of continual improvement in all of the company's business activities and risk mitigation.

One of the best methods to ensure we attain a culture of best practice is the Quality Management System and risk processes built into our health & safety system we have implemented to assure we deliver our products in accordance with the requirements of ISO 9001:2015.

The strength of this company and the effectiveness of our quality management system is in the same hands that deliver our products; it is up to us all to ensure the continual improvement of our products and always remember our quality objectives are:

- To supply our customers with the product they asked for.
- To supply the product when and how they wanted it delivered.
- Ensure the product is at a fair price, fair for them and us.
- Provide service that exceeds their expectations and keeps them coming back for more.

This policy is authorised for implementation by:

.....
